

Culvert Permit

We are sending you a culvert permit per a request. We will size the culvert after you have flagged the area, then we will contact you to let you know what size culvert you need to purchase. We will set the culvert and back fill with crushed rock with no charge. However, we do require the landowner's signature on the enclosed permit. You may sign and return the permit to our office so that we may send someone out to determine the size. After the permit has been received, and the area staked/flagged, we will then go and size the area.

We will contact you with the proper size of the culvert to be purchased by you. The diameter must be as we determine, and the length we determine shall be the minimum length. It is usually in the property owner's best interest to go longer in the length, due to the fact we will only set the culvert ONCE. Remember **any future changes are at your own expense.**

After the purchase has been made we will contact the supplier for delivery. We do like to inform you **we do not pick up culverts.** We provide a list of the local suppliers who work with the county in the delivery of the culvert.

Please inform our office once the area has been staked, and the permit has been sent to our office.

LOCAL CULVERT SUPPLIER'S

Le Roy Schroeder Cont	979-836-6521
McCoy's	979-836-6766
Woodson Lumber	979-836-7933
